

TILUX ShowerBoards – The ready to tile shower system that installs in minutes

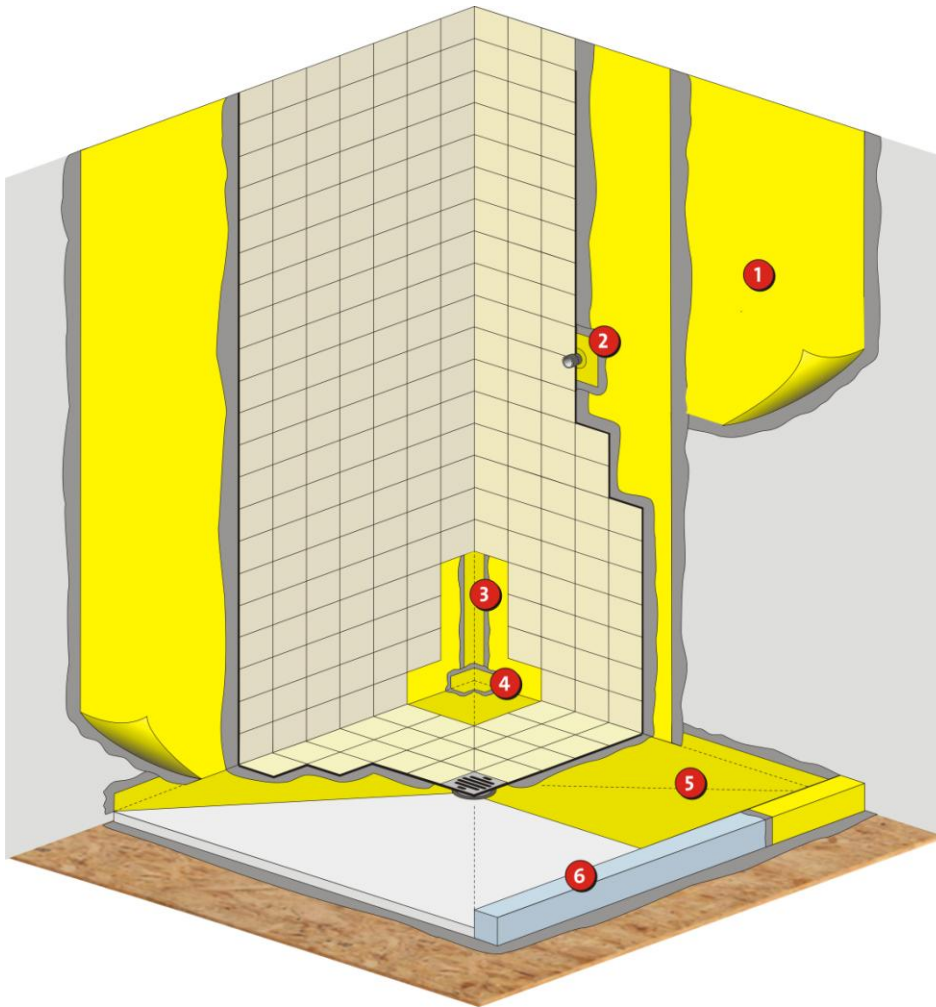

Floor-level showers make life a whole lot simpler. They are barrier-free, easy to use and above all, safe for the elderly – all good reasons for creating a modern bathroom design. Thus Dural has developed “Tilux”, a fully prefabricated shower board which is ultra-flat, making it ideal for newly built bathrooms and extremely convenient for fast and straightforward bathroom renovation projects.

This all-in-one solution with its factory-fitted, integrated waterproofing membrane is ideal for ultra-low installation heights down to 10.5 cm. “Tilux” has everything you need to install a barrier-free shower system – from the secure and leak-tight integrated drain flange, a height-adjustable grille cover (up to 22 mm) and the easy-to-fit vertical drain outlet.

The Dural system can withstand high intermittent loading and is also safe for wheelchair access. The shower boards are suitable for surface finishes using tiles, natural stone and mosaic measuring 20 mm or more. With the addition of the Durabase WP sealing products, perfect and secure composite bonded seals can be created between shower system, walls and floors. Following installation, all that remains is to finish off by covering the “Tilux” shower board with tiles or natural stone.

A perfect and secure adhesive seal is guaranteed using the available accessories in the DURABASE WP sealant series (membrane for walls and floors, sealing tape, external and internal corner pieces and pipe sleeves).

- 1 DURABASE WP Waterproofing as easy as wallpapering-membrane for wall and floor
- 2 Pipe and mixing valve seal
- 3 Sealing tape to cover membrane joints
- 4 Corner pieces
- 5 TILUX pre sloped shower board with permanent waterproofing membrane
- 6 Shower curb (Option)

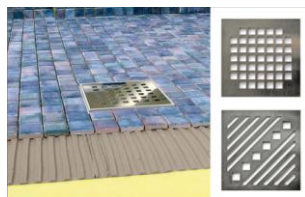

Installation of the TILUX Board is fast, safe and easy:

Cut drain pipe 2 1/4". Since the shower board has a 2% slope build in, the subfloor has to be level in all directions

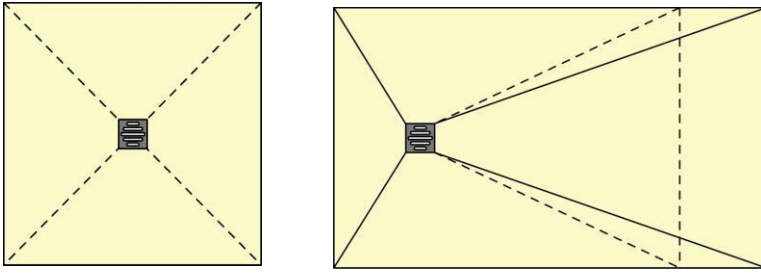

The integrated sealing membrane firmly attached to the solid 2% pre-sloped board makes installation easy

Immediate tile laying and different grate designs made of stainless steel

The TILUX shower board complete system in detail

A wide range of different formats, available in both square and rectangular shapes, for every installation situation. Ranging from 90 x 90 cm, 150 x 150 cm to 150 x 90 cm

A video of the fast, easy and safe installation of the Dural showerboard “Tilux” you can watch on: <http://youtu.be/dAaxUuUIhtE>
